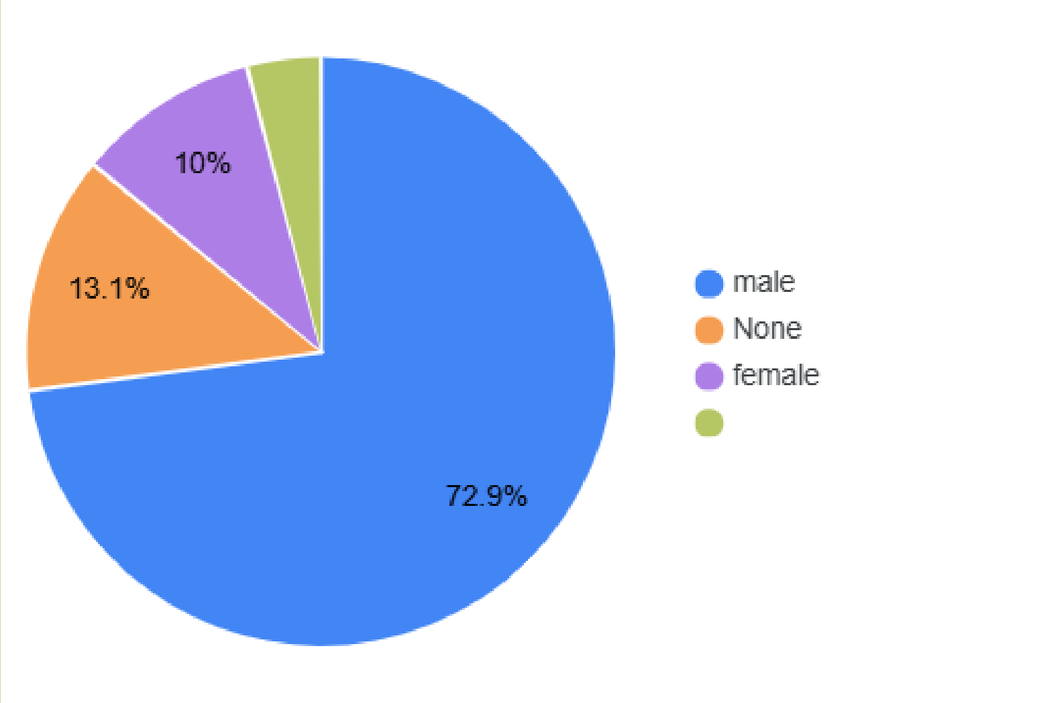
BrightTV Analysis

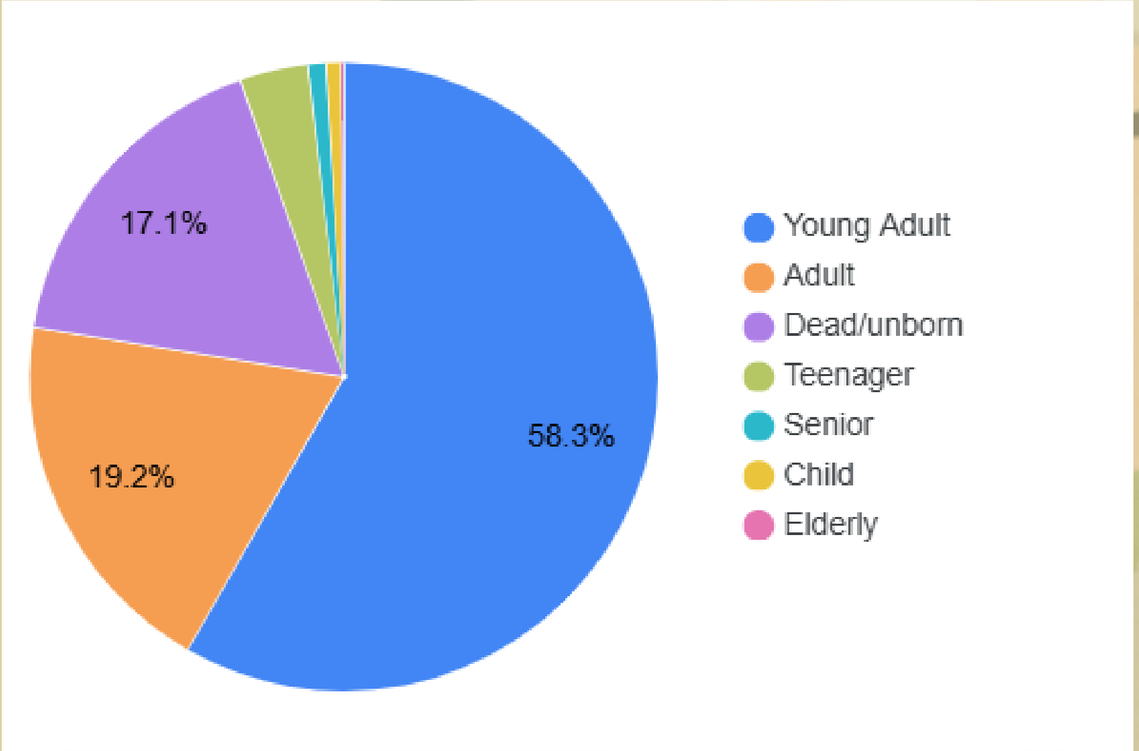
This Station has 5 375 Subscribers all across south africa. It has a wide range of viewers differing in age, race and gender. This analysis will dig into how they differ and ow we can increase viewers all across these spectrum.

BrightTV Analysis- Gender



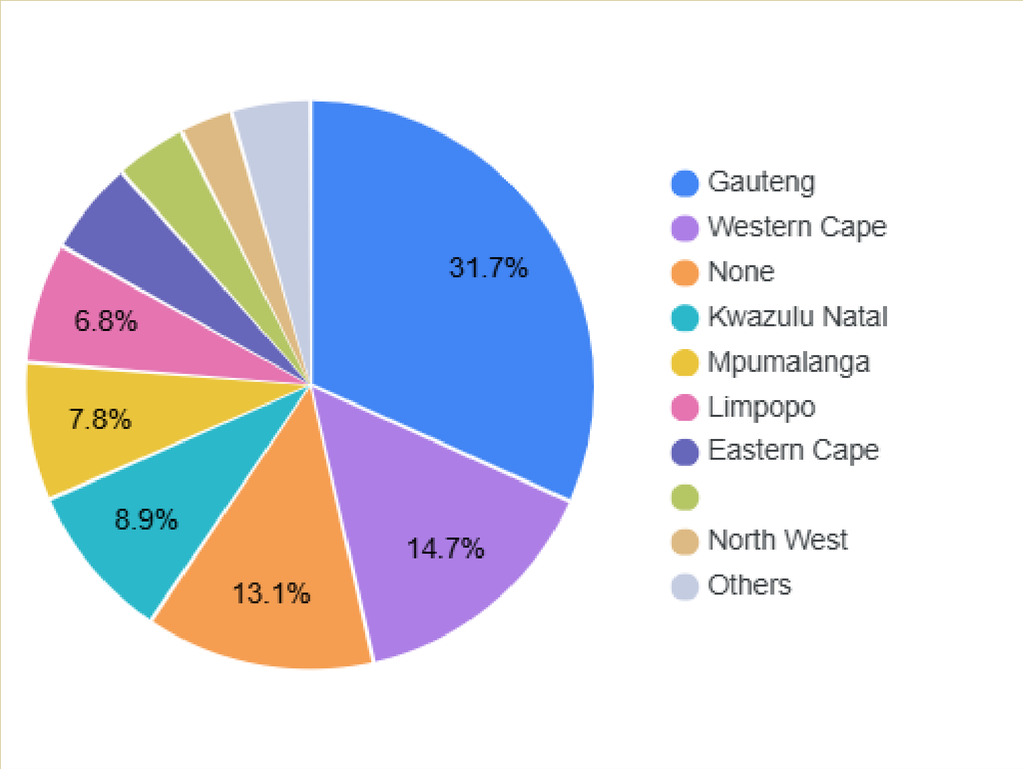
The dominating gender in the subscriptions is male. The are 3 918 males in total. This shows that the shows that play are mostly for males. If you want to increase viewership of the females you need more inclusive content and marketing. As to expand your viewer criteria.

BrightTV Analysis- Age Group



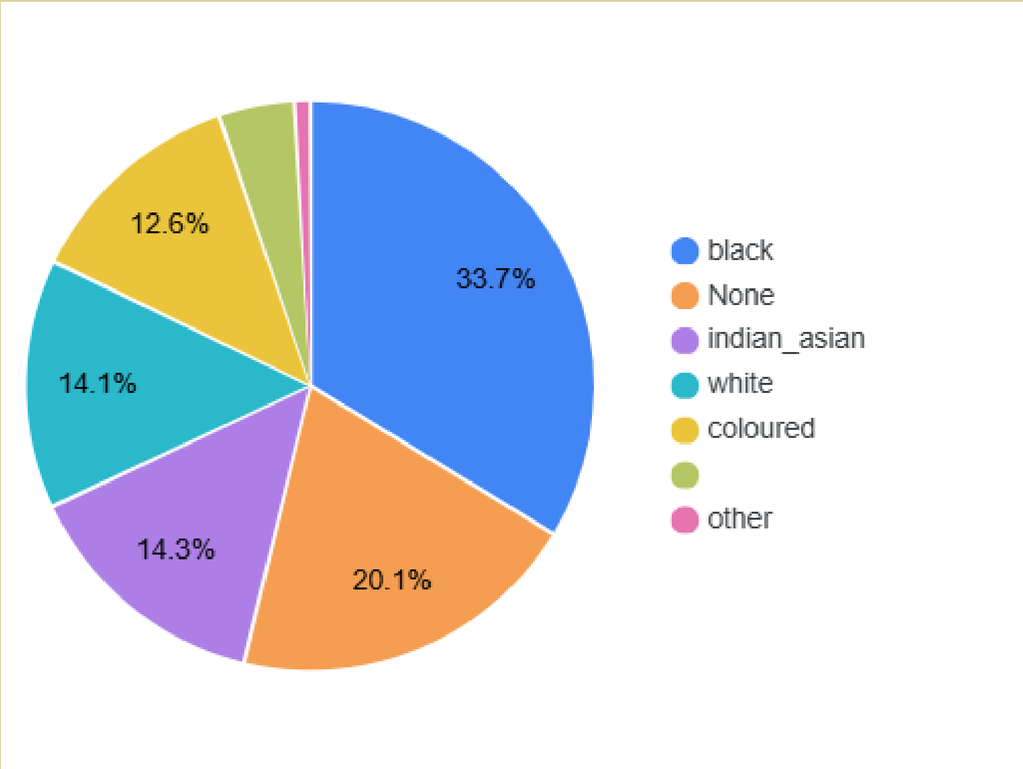
The age group with the most subscribers is Young Adult at 3 133 subscribers.
The number of registered subscribers go down as age goes up. Shown targeting the elderly and young can be increased at less busy times as they usually are at home when the Young Adults are out.

BrightTV Analysis- Province



The subscribers are more in the more urban provinces showing that most shows in the channel/station resonate with city dwellers than rural area users. The station can increase the shows most liked as city dwellers with tv are more in urban areas than in rural ones. You just need too ook at when they are watching what they are watching to better get what needs adding.

BrightTV Analysis- Race



Most users of this station are black at 1 811 subscribers.
Most subscribers are not registered. You can use adverts and slogans to get them to subscribe and get better information about users to better make dicisions about the focus and plans for the station
